

I am writing to object to Sinclair Broadcasting's use of the public airwaves, which belong to all the people, to have their stations promote a particular partisan view just before the coming presidential election. This is unlawful, and it is your responsibility to stop it from happening.

If you demand that they present also a film offered by the other party(such as "Swimming Upriver") following The Republican promotional, this might could solve the problem.

Sinclair uses the public airwaves free of charge, and is obligated by law to serve all the people, and give both sides in this election.
